

Inspirational WCs and **Installation Systems**

Roca Installation Systems

Roca installation systems

Introduction

Installation systems are a fundamental part of the bathroom. Roca installation systems offer an affordable solution when a practical, hygienic and modern bathroom design is called for. A wide range of different installation options are available, allowing easy install of wall-hung and back-to-wall WCs along with bidets and basins.

Compact and low height solutions are available to suit all bathroom spaces. Finish the look from a choice of various different operating panels, including two new electronic options which can be programmed as per your requirement.

With a choice of twenty-five wall-hung and seventeen back-to-wall WCs to choose from there is a wide variety of styles from modern to traditional available. New to the collection is In-Wash® Inspira our first innovative Smart WC.

What is an installation system?

An installation system is a concealed cistern which is installed behind the wall and hidden away from the visual eye after installation. The use of an installation system will transform the look of any bathroom space, modernising rooms and visually enlarging spaces by removing the use of a traditional ceramic cistern.

How does an installation system work?

Installation systems work exactly the same as traditional ceramic cisterns, the operating panel flushes the WC with the press of a button. An installation system gives you the option to personalise the look of your WC with the choice of different operating panel designs available in various different colour finishes.

How are installation systems maintained after installation?

The operating panels which operate the flush of the WC can be easily unclipped which allows access to the cistern internals to carry out general maintenance required.

All Roca installation systems offer a 5 year guarantee on the cistern* and a 10 year guarantee on the frame.

* Including concealed cistern internals, excluding diaphragm washer.

Roca withhold the right to withdraw products and amend prices at any time, prices inclusive of VAT are listed within brackets (). Images featured are for illustrative purposes only. For full technical specifications please visit our website www.uk.roca.com to download technical drawings, view installation videos and installation manuals. Dimensions are in mm, due to manufacturing processes all dimensions are approximate.

Duplo WC Compact and Dama-N wall-hung WC

Designing your bathroom

Choosing your WC, installation system and operating panel

Use these three easy steps to design your new WC

#1 Choose your WC

pg. 4-17

Wall-hung or back-to-wall (floor-standing) options are fully compatible with Roca's installation systems, choose your WC depending on your style and desired finished look.

#2 Choose your installation system

pg. 18-25

There are various different installation systems available suiting wall-hung or back-to-wall WCs. When you have chosen your WC, choose an installation system which best suits your bathroom space, there are standard, compact and under-window solutions available suiting any bathroom installation.

#3 Choose your operating panel

pg. 26-30

Finish the look of your bathroom with the operating panel, the final visible component after installation. Choose a traditional push-button operating panel or a new electronic operating panel which can be programmed to flush automatically after using the WC.

#1 Choose your WC

Wall-hung options

Modernise bathroom spaces with the addition of a wall-hung WC pan. Fully compatible with Roca's installation systems, the pans are safely secured to a robust steel frame which is installed behind the wall.

Wall-hung WCs

N New products

New wall-hung WCs have been added to the Aire, Debba and Inspira bathroom ranges.

ECO WCs

With water-saving in mind the new Debba and Inspira WCs can be flushed at 4.5/3 litres, saving water and reducing annual household utility bills.

Hidden fixations

Inspira wall-hung WC pans benefit from a smooth, seamless design thanks to the hidden fixations which are located underneath the pan, improving design aesthetics.

Inspira Round

Inspira Square

Smart WC

Comfort and hygiene come together to provide a unique experience with the In-Wash® Inspira Smart wall-hung WC.

Smart, efficient and reliable

Every single detail of the In-Wash® Inspira WC has been designed with a clear purpose: to bring home the most advanced, practical and pleasant toilet ever created. A remote control, night light, adjustable water and air temperature, self-cleaning nozzle, user detection technology, hidden fixations and rimless pan are just a few of the advanced features this Smart WC has to offer.

Rimless

The new generation of Roca rimless toilets represents the best in innovative design and new flushing technology.

Rimless WCs have been extended into the Debba, Inspira, Nexo and The Gap ranges.

Easy to clean

The removal of the rim simplifies the design offering a smooth surface which is easier to clean.

Optimal flushing

The distributor flushes the water around the pan providing a thorough flush which exceeds European standards.

Hygienic solution

Bacteria growth is discouraged thanks to the removal of the rim from the design.

Wall-hung WCs

Note: WC height dimensions state the recommended installation height. Where applicable, height dimensions for the WC pans do not include the seat dimensions. Due to manufacturing processes all dimensions are approximate. Dimensions in mm.

Inspira Round wall-hung WC with PL1 operating panel

Meridian-N comfort height WC with PL5 operating panel

Back-to-wall WCs

N New products

New back-to-wall WCs have been added to the Aire and Inspira bathroom ranges.

Aire, a soft and simple back-to-wall design which complements its sanitaryware collection.

Inspira Round, an ergonomic and versatile back-to-wall pan which has been designed to complement all round, soft and square basin options from the Inspira bathroom collection.

Aire

Comfort height

Designed to sit higher than a standard WC pan with a raised height of 480mm to the top of the seat. Comfort height pans enhance well-being providing a solution for users who may suffer from back or joint problems, or may benefit from the use of a raised height pan without the need of a full DOC M accessible WC.

Available in two popular collections with distinct different designs, Meridian-N and The Gap provide comfort, not compromising on style.

In-Tank

WC with integrated cistern

Roca revolutionises the world of the bathroom with In-Tank; a system that, for the very first time, integrates the cistern and flush system within the WC itself.

In-Tank offers an alternative installation solution; without the requirement for a concealed cistern or installation system to be installed due to its integrated cistern design, In-Tank saves space and installation time.

Easy to install, all components required for installation are supplied within one box.

Wall-hung WC

893302000 WC pan, frame and soft-close seat (for solid walls) **£1,345.42 (€1,614.51)**
893301000 WC pan, frame and soft-close seat (for stud walls) **£1,614.23 (€1,937.08)**
Note: In-Tank WCs feature an integrated cistern, an installation system is included with the WC as standard

Back-to-wall WC

893303000 WC pan and soft-close seat **£1,345.42 (€1,614.51)**
Note: In-Tank WC pan features an integrated cistern, an additional concealed cistern will not be required with this product

#2 Choose your installation system

Installation systems for wall-hung WCs

Compact installation system with Dama-N wall-hung WC

A wall-hung WC requires an installation system which includes a concealed cistern and supporting steel frame, each installation system is capable of holding up to 400KG of weight.

Concealed cisterns for back-to-wall WCs

Basic Tank LH concealed cistern with Hall back-to-wall WC

A back-to-wall WC requires a concealed cistern only as the WC does not require any additional support when installed on the floor.
